

Astra AI Wellness Companion

Visual UI/UX Flow Architecture

This document contains high-fidelity visual mockups of the newly secured patient journey.

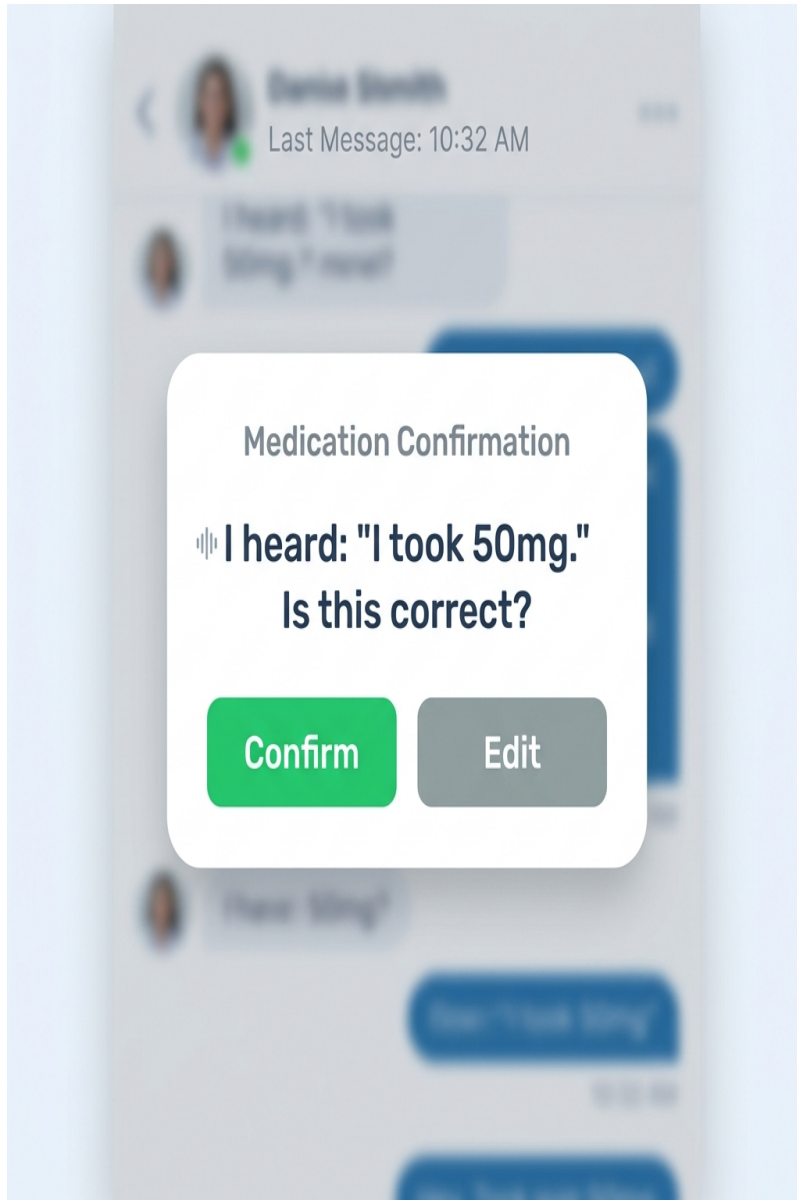

Screen 1: The Main Chat Interface

The primary interaction hub. Renders using ListView.builder to prevent infinite scroll crashes.

■ **Backend Security: XSS Sanitizer actively scrubs AI responses before rendering here.**

Screen 2: Voice Confirmation Gate

Triggered when the user speaks into the microphone.

■ **Backend Security: Prevents the AI from acting on dangerous audio misinterpretations.**

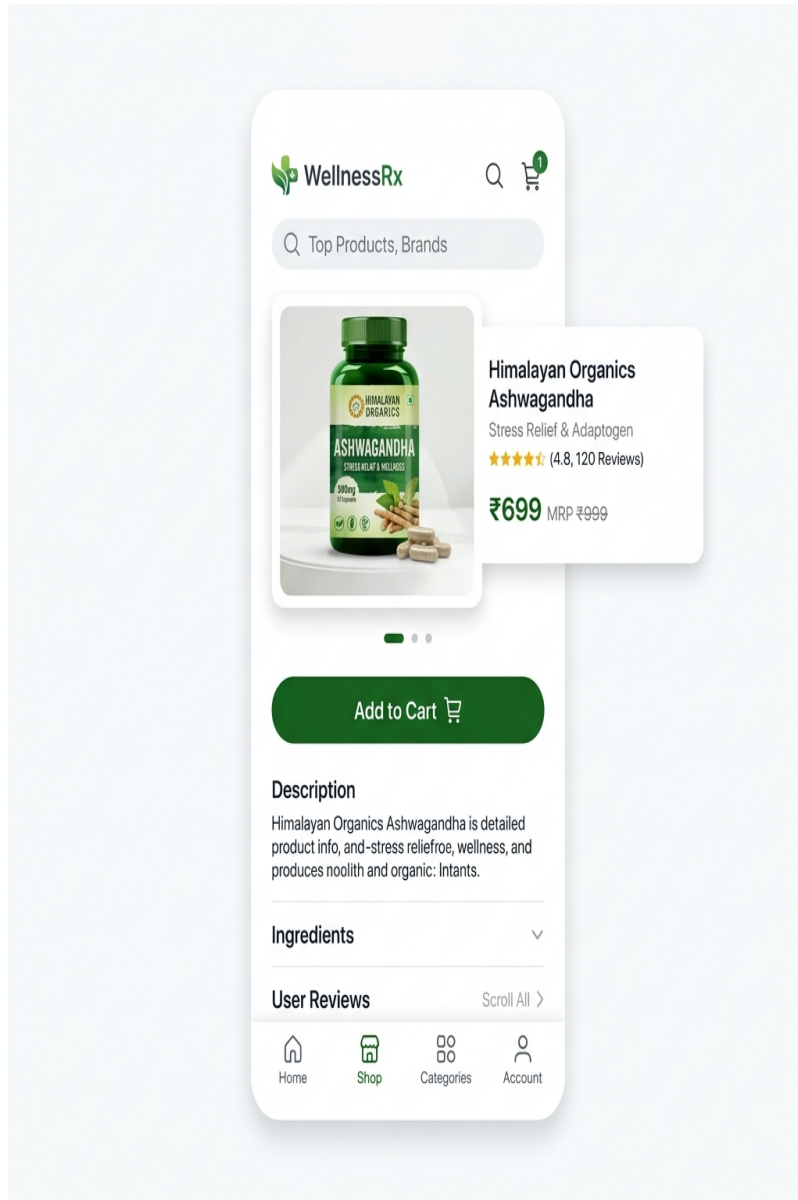

Screen 3: Safety Lock & SOS Escalation

Triggered by the Cultural Clarification & Safety Middleware if a medical emergency is detected.

■ **Backend Security: The AI chat locks permanently and the prompt is etched into the Immutable Ledger.**

Screen 4: Smart Cart & Doctor Handoff

Triggered after a Doctor reviews the audit logs and prescribes medicine.

■ **Backend Security: Prevents Prompt Injection. The AI cannot generate this view, only an authenticated Doctor's JWT token can.**
